

EXTRA HELP KEEPING WARM...

BODY LOTION AND MINI HEATERS

INSULATING BODY LOTION

Helps hold in natural body heat by creating an insulation barrier film on the skin. When applied before exposure to cold, it will decrease heat lost through evaporation. Lotion does not create heat, but does help contain the heat that your body generates. Its ability to contain heat will depend on your activity level, metabolism and body chemistry.

Apply before exposure to cold to any part of you that gets cold, and reapply as necessary. Lotion is non-greasy, odorless and washes off with soap and water.

#HEA-HHZ DISPOSABLE DOUBLE-PAK MINI HEATERS

2" X 3" EACH. Comes as a pack of two; one for each hand. Provides 130°F to 140°F heat for up to 10 hours! Many users place inside of glove for added warmth.

Remove outside wrapper and shake to mix and activate contents. Allow approximately 15 seconds for maximum warmth.
