

# ALUMINUM WALK RAMPS

Our portable aluminum truck ramp is a low-cost, double-safety ramp designed to speed loading and unloading, especially where facilities are limited or non-existent. Carrying this ramp in your truck speeds delivery by reducing time at each stop — cutting costs at the same time.

To suit your needs better, two types of ramps are available:

**Type A**  
The level-off apron overlaps the truck bed. Safety Chain (18") Standard.

**Type F**  
Steel hooks lock onto the truck bed providing flush-type direct entry.

# ALUMINUM WHEEL RAMPS

Portable Ramps Raise Vehicles Closer to Dock Height for Efficient Loading

WITHOUT WHEEL RAMPS

WITH WHEEL RAMPS

To select your ramp:  
Ramp selection is based on the following three items:

- A **Width**- Based on the maximum wheel width of your largest vehicle. For double wheel vehicles, choose the 24" width and use the ramp at the inside wheel location.
- B **Height**- Determined by the following formula: (Dock Height + 2") — Truck Bed Height = \_\_\_\_\_. Choose the next highest standard height in chart.
- C **Length**- The longer the ramp, the less incline angle. Choose a length with an incline angle that your loaded vehicles can negotiate easily.
